

ECO2 is a Venturi injector specifically designed for aquaculture. It works hydraulically, exploiting the pressure of water flowing through a nozzle placed in a pressurized chamber, without requiring additional energy to the system. With this simple device it is possible to enrich water with air or pure oxygen using a pump or by gravity. Through its contact chamber ECO2 provides for high dissolution of injected gas by increasing both the surface area and the time of contact between oxygen and water. ECO2 has been designed to optimize the water supply by the injection of air with minimum waste for enhanced oxygenation and homogenization.

FEATURES

- Maintenance-free
- Easy to handle and install
- Fresh and salt water applications
- Suitable to inject air, pure oxygen, ozone and chemicals
- 3 different nozzles available, from 30 to 100 liter/minute, for better adaptability to every situation

O2/O3 DEDICATED INLET

3 DIFFERENT NOZZLES
